Minutes of the first and only meeting of the "SLO Flyers Replace and Move the Shed Committee". Held on June 24, 2016.

Members present,

Daryl Riekki
Tony Jacobson
Steve Wagner
Dave Nowell
Tony Gallo
Mike Rittenhouse

Discussion items.

What is the purpose of replacing and moving the equipment shed?

The shed has reached the end of its service life. Relocating the shed to the north end of the club trailer will expand the north end of the pits and make more room for other activities, such as tables for rotor-wing prep, etc..

Should SLO Flyers buy or build a new equipment shed?

Dave Nowell investigated available metal sheds and found them lacking both durability and security. He then prepared drawings of a possible build on site shed.

Is there a major difference in price between types of shed?

No, considering all costs, prices are about equal.

Which shed is more secure?

Built correctly, the on site built shed will be more secure. The committee examined Dave's plans and concluded the project should proceed. The results should produce a quality, long lasting shed.

Can costs be reduced?

Rather than buying prebuilt doors, site built doors will reduce the price by several hundred dollars. Several other items were examined and changes will reduce costs.

Would a paint party be appropriate?

Yes, the 9th of July would be perfect. Further, members who would like to paint on weekdays prior would be welcome and should contact one of the committee members for supplies.

What is the next step?

Order the materials, paint and begin cutting wood and pounding nails. Tony J. Dave Nowell and Rick Johnston are heading up the construction and would welcome help.

Agreement for this project was reached by consensus officers and members Present.
